PEACHTREE'S OAK AND SMOOTH ENTRY DOOR SYSTEMS OFFER VARIETY AND ADAPTABILITY

MOSINEE, Wis., — Peachtree® Doors and Windows has introduced its Oak and Smooth Collection of fiberglass entry door systems as part of its all-new entry door line. Together, the two collections offer nearly 40 different panel styles and almost endless combinations when paired with vast options in sidelites and transoms.

The collection is available in 6'8" and 8'0" heights in panel styles ranging from flush to nine panel, half lite to full lite, and with intricate scroll top and arch top designs. Configurations include: in-swing and out-swing single and double doors (center-hinged or side-hinged), with single or double venting or non-venting sidelites, or a double door with two fixed panels. For additional design detail and sunlight, custom-shaped direct-set windows and transoms in rectangular, elliptical, half circle, extended leg eyebrow and extended leg half circle shapes are available with clear insulated glass or decorative glass to match the door panel. An inconspicuous retractable screen is an option for in-swing doors.

"The Oak and Smooth Collection is all about choices," said Jeff Kibler, brand manager for Peachtree Doors and Windows. "With the variety of panel styles, sidelites, transoms and direct set windows, and prefinished options available, we're able to create practically any entry homeowners may envision for their custom homes."

The Oak and Smooth Collection is available in 10 durable enamel factory finishes: Classic White, Ivory, Pebble Tan, Obsidian, Dark Bronze, Brick Red, Forest Green, Sierra Brown, Indigo and 300 Series Tan. Factory-stain finishes of Moorish Teak, Rose Wood, Dark Mahogany, Natural Teak, Provincial and Golden Oak can bring out the wood-grain texture of the Oak Collection or provide a warm finish to the Smooth Collection doors. Homeowners can choose to have one side of the panel finished, or both, and a panel can be stained on one side and painted on the other. Exterior frames are available in primed wood, stain-grade pine, aluminum cladding in 9 standard colors or 46 designer colors, vinyl cladding in white or tan, or

(more)

white fiberglass. Primed or stain-grade interior frames can be prefinished in white or stained to match the door panel. Simulated Divided Lite (SDL) grilles also can be painted or stained to match the door panel.

Tempered clear insulated glass is standard on entry doors, with clear glass upgrade options that include Zo-e-shield™ 5 and 6, which provide superior U-factors and solar heat gain coefficients compared with Low-E² glass and the added convenience of EasyCare® glass on the exterior lite. For added flair, the Oak and Smooth Collection is available with a choice of eight decorative glass patterns. The elaborate and distinctive glass designs include classic geometric, floral, wrought-iron and prairie-style designs.

For homeowners who prefer clear glass, SDL, Grilles-Between-The-Glass (GBG) and Optically Divided Lites (ODL) are available for subtle enhancements. Peachtree also offers completely dust-free and maintenance-free Blinds in the Airspace for the Oak and Smooth Collection.

In addition to the Oak and Smooth Collection, Peachtree's new entry door line includes the Rustic Collection, the Craftsman Collection and Mahogany Collection of fiberglass doors. Steel and fire-rated doors are also practical options for builders and homeowners.

Foundational Components

All of the new entry door systems are available with Peachtree's continuous head, sill and frame system. The single frame system is easier to install and reduces susceptibility to air and water infiltration. Part of the single frame system, Peachtree's exclusive composite sill contains no wood, guaranteeing years of trouble-free use and no potential of rot. It is available in fixed, adjustable, high performance and ADA-compliant styles

The polyurethane core of all Peachtree entry doors delivers six times the energy efficiency of a wood door and also provides greater durability with less maintenance. The doors are completely CFC-free to help protect the earth's ozone layer.

Hardware

Every Peachtree entry door frame is equipped with steel strike-plate reinforcements to guard against forced entry. For added security a stainless steel multi-point locking system is available. Multi-point handle sets are available in either a Classic Curve or Contemporary style. All are

(more)

available in seven lush finishes: Polished Brass, Antique Brass, Oil-Rubbed, Brushed Nickel, Polished Chrome, Brushed Chrome and White. In addition to durable standard hinges, Peachtree entry doors are available with mortised adjustable hinges, spring-loaded hinges and commercial ball bearing hinges.

About Peachtree

Peachtree Doors and Windows has been manufacturing millwork products since 1959. Headquartered in Mosinee, Wis., Peachtree manufactures and markets wood windows and patio doors, and steel and fiberglass patio and entry door systems. Products are sold nationwide through home improvement retailers and building materials dealers. For more information about Peachtree's complete product line, visit peachtreedoor.com or call 800.732.2499.
