PEACHTREE'S NEW 700 SERIES REPLACEMENT WINDOWS EXTEND THE BRAND'S VERSATILITY TO R&R MARKET

MOSINEE, Wis., — Peachtree® Doors and Windows has introduced its new 700 Series Replacement Windows to remodelers and replacement specialists, offering them the same versatility and aesthetic appeal of the 700 Series for new construction. The 700 Series extruded aluminum clad replacement windows offer homeowners superior energy performance, quality and style with nearly endless options to enhance their home's interior and exterior design—all with less installation hassles and disturbance to the home's siding, walls or existing interior and exterior trim than full-frame replacements.

"Homeowners looking to update their homes' outdated, rotten or inefficient windows can now get the same attractive features and options as Peachtree's 700 Series for new construction," said Jeff Kibler, Peachtree brand manager. "This product line also has built-in features and options to save remodelers and window installers time – things like three sill angles and exterior accessories ensure a weather-tight fit in existing frames."

The 700 Series Replacement, or pocket, Windows are available in easy-tilt double hung, casement, awning, single slider and picture styles. Homeowners can tailor 700 Series windows to virtually any custom shape or size.

Three sill options are available on the Peachtree 700 Series Replacement Windows: Flat, Intermediate (8 degree slope) and Maximum (14 degree slope), giving installers latitude for covering any gaps that may exist between the old frame and the new window. The varying sill slopes also provide additional visible glass over competitive replacement windows, and a clean, seamless exterior finish. Additional exterior trim accessories further assist installers in covering gaps that may result

(more)

between the new window and the existing frame. This includes blind stop covers and Retro-Z trim, which is popular in western markets.

Interior wood species on the 700 Series Replacement Windows include standard pine (available in natural, primed, or prefinished white or stained), or oak, maple, character alder, cherry, mahogany or Douglas fir. The double hung units can be ordered with wood jamb liners that conceal the vinyl balance system used in the tilting wood windows for a consistent wood appearance across the jamb.

The extruded aluminum clad exteriors on the 700 Series comes in eight standard colors, 47 designer colors or any custom-matched color. Standard color options include Classic White, Ivory, Pebble Tan, Forest Green, Sierra Brown, Brick Red, Dark Bronze and Obsidian.

Grilles options for the 700 Series Replacement Windows include several stylish options to correspond with a home's design: Grilles-Between-The-Glass (GBG), Interior Snap-In Removable Grilles, Simulated Divided Lites (SDL) or Optically Divided Lites (ODL). SDLs and GBGs can be color coordinated to the unit's exterior clad color.

Zo-e-shield™ 5 with Real Warm Edge® Spacer Systems comes on all 700 Series Replacement Windows, providing optimal energy efficiency, and superior U-factors and solar heat gain coefficients compared with Low-E² glass. EasyCare® coating, which resists dirt and water spots, is the standard exterior coating of Zo-e-shield glass.

Peachtree Doors and Windows has been manufacturing millwork products since 1959. Headquartered in Mosinee, Wis., Peachtree manufactures and markets wood windows and patio doors, and steel and fiberglass patio and entry door systems. Products are sold nationwide through home improvement retailers and building materials dealers. For more information about Peachtree's complete product line, visit www.peachtreedoor.com or call 800.732.2499.
