PEACHTREE'S 300 SERIES VINYL CLAD WINDOWS AVAILABLE WITH EXTENSIVE OPTIONS

GAINESVILLE, Ga. – The 300 Series vinyl clad wood windows from Peachtree® Doors & Windows offer consumers many easy-living features to fit their lifestyles. The 300 Series is attractive, requires little maintenance, delivers superior energy efficiency, and is easy to use. The product line is available in a wide selection of Peachtree's best-selling shapes and sizes.

The 300 Series includes double hung, casement, awning, direct set picture, transoms and bay/bow styles with dent-resistant, extruded vinyl clad exteriors in White or Tan, and a choice of interiors – clear-finished pine or white PVC.

“Consumers don't have to sacrifice beauty or performance to get a great deal,” said Chris Brown, Peachtree national sales manager. “The 300 Series is a full line of entry-level windows with many, many upgrades to tailor a window package. Homeowners can customize the look of their windows with optional hardware finishes, wood interiors, grilles or transoms. The 300 Series delivers practically anything consumers want.”

Many details of the 300 Series increase the appeal for consumers and builders: recessed cam locks, smooth-operating block and tackle balance systems, and an easy-tilt sash with flush mounted tilt latches on the double hung units; the tandem locking system on the casement windows; beveled frames and sashes for added depth; and an integral 1-1/2" extruded nailing fin, which speeds installation and provides added strength.

(more)

The 300 Series windows come with multiple weatherstrips and gasket seals that virtually eliminate the possibility of water or air infiltration. A 3/4" insulated glass is standard on the 300 Series, providing an extra layer between the home's interior and the elements outside. A warm-edge spacer system helps save heating and cooling costs by insulating the edge of the glass 50 percent better than windows with metal spacers.

For added convenience and energy efficiency, consumers can choose EasyCare™ Low E² high performance glass. EasyCare has an exterior coating that helps water sheet off, allowing the glass to dry faster with less streaking to keep windows cleaner longer.

Grilles-between-the-glass (GBG) are available in White or Tan to match the exterior clad color of the 300 Series windows.

Peachtree Doors & Windows has been manufacturing millwork products since 1959. Based in Gainesville, Ga., the company has manufacturing facilities in Gainesville and Huntington, W.Va. Peachtree manufactures and distributes a full line of vinyl clad and aluminum clad windows, and fiberglass and steel entry doors and patio doors that offer easy living features. Products are sold nationwide through building material dealers. For more information about Peachtree's complete product line, visit www.peachtreedoor.com or call 800.732.2499.
